

EXMOOR'S HUGE TIDES!

These pictures show Lynmouth harbour at low and high tide. The sea will go from one to the other in just over 6 hours!

The sea at Minehead can rise and fall as much as 12.5m. That's the same height as 3 double decker buses stacked on top of each other!

Measure a member of your group or find someone who knows how tall they are. Once you know their height work out how many times they would have to stand on top of each other to reach 12.5 meters high. That's how much the water can rise in around 6 hours!
