

Make Your Own Footprint Stamp

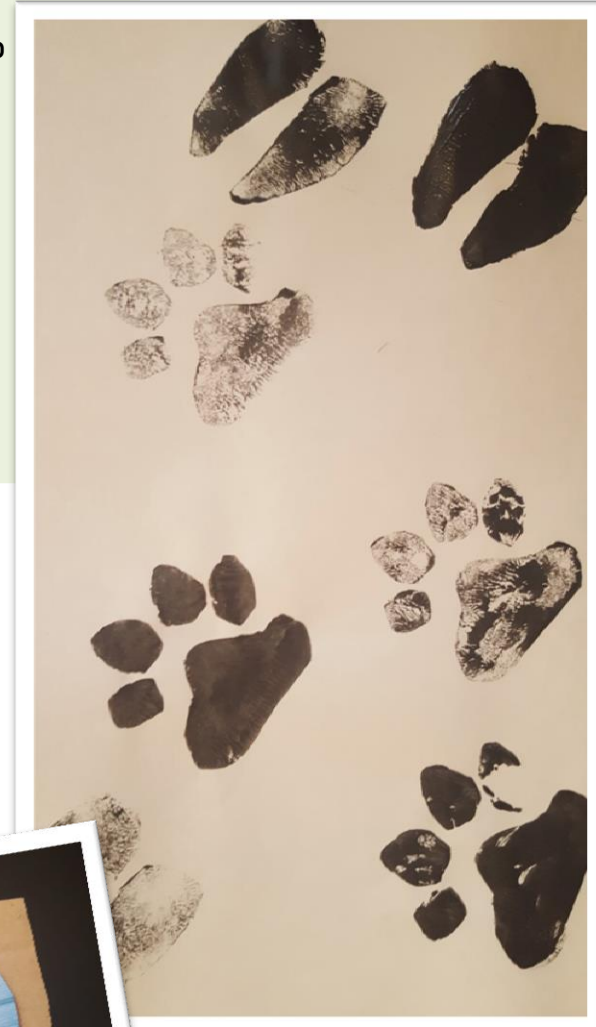

What you'll need:

- Some thick cardboard
- Cereal box or similar
- Pictures of animal tracks (look online)
- Paper
- Scissors
- Glue
- Pencil
- Paint
- Paintbrush

Step 1

First, cut out a square of the thick cardboard to be the base of your stamp. Next look online at what animal tracks you would like to pick. On another piece of thick cardboard draw the animal track you've chosen and cut out.

Step 2

With the tracks you've just cut out - use them as a template to draw around onto the cereal box cardboard. Then cut those out too.

Step 3

Now stick the thick animal tracks onto the square cardboard first THEN on top of those stick the cereal box cardboard - glossy side up!

This is important as the glossy side allows you to use your stamp again and again. Now you are ready to add paint to your animal tracks and use carefully as a stamp across some paper!
